- 10 radnika proizvede 10 čaša za 5 minuta. Za koliko će minuta 50 radnika proizvesti 50 čaša? / *10 workers produce 10 glasses in 5 minutes. How many minutes will it take for 50 workers to produce 50 glasses?*
  - A. 5
  - B. 10
  - C. 15
  - D. 20
  - E. 50
- Ako je GAKO GOKA, 7183 je: / *If GAKO is GOKA, then 7183 is:*
  - A. 7318
  - B. 7381
  - C. 7813
  - D. 8137
  - E. 7138
- U nizu 10O12, 14P16, 18R20, sljedeća skupina je: / *In the sequence 10O12, 14P16, 18R20, the next group is:*
  - A. 20S20
  - B. 22S22
  - C. 22S24
  - D. 22Š22
  - E. 22Š24
- Na jednom kraju vage nalazi se lubenica, a na drugom kraju pola takve lubenice i uteg težak 4 kg. Vaga je u ravnoteži. Koliko je teška cijela lubenica? / *At one end of a scale, there is a watermelon, and at the other end, half of such a watermelon and a 4 kg weight. The scale is balanced. How much does the whole watermelon weigh?*
  - A. 2 kg
  - B. 6 kg
  - C. 9 kg
  - D. 8 kg
  - E. 4 kg
- U nizu 1,5,10,16,23,31, sljedeći broj je: / *In the sequence 1,5,10,16,23,31, the next number is:*
  - A. 39
  - B. 40
  - C. 50
  - D. 55

6. Nana ima 65, a unuka 5 godina. Za koliko će godina nana biti pet puta starija od unuke? / *Grandma is 65 years old, and her granddaughter is 5 years old. In how many years will Grandma be five times older than her granddaughter?*
- A. 5
  - B. 10
  - C. 15
  - D. 20
  - E. 25
7. Prosti brojevi su prirodni brojevi koji su bez ostatka djeljivi samo s brojem 1 i sa samim sobom. Koji od sljedećih brojeva JE prost broj? / *Prime numbers are natural numbers that are divisible without remainder only by the number 1 and by themselves. Which of the following numbers IS a prime number?*
- A. 504
  - B. 757
  - C. 912
  - D. 1065
  - E. 915
8. Ako broj smanjim za 2, a onda rezultat pomnožim sa 4, dobijem 24. Koji je to broj? / *If I decrease the number by 2 and then multiply the result by 4, I get 24. What is that number?*
- A. 6
  - B. 9
  - C. 5
  - D. 8
  - E. 10
9. Koliko je  $A+B+C$  ako je: / *How much is  $A+B+C$  if:*
- $A - B - C = 25$
  - $A - B = 30$
  - $B + C = 15$
- A. 40
  - B. 45
  - C. 50
  - D. 55
  - E. 60

10. U nizu od četiri kuće, Mujagići žive pored Kamarića, ali ne i pored Brkića. Ako Brkići ne žive pored Pepića, ko su neposredne komšije Pepića? / *In a row of four houses, the Mujagić family lives next to the Kamarić family, but not next to the Brkić family. ## TEKST 1

### Odlomak (Ruso, 1762/1989).

\_\_\_\_\_ Nije slobodna riječ koja ne znači ništa, nego je ta riječ nužda. Pretpostaviti kakvu radnju, kakvu posljedicu koja ne ističe iz nekoga aktivnog principa, znači uistinu pretpostaviti posljedice bez uzroka, a to je upasti u „*circulus vitiosus*“. Ili nema uopšte prvoga impulsa, ili nijedan prvi impuls nema nijednoga ranijeg uzroka, i onda nema prave volje bez slobode. \_\_\_\_\_ To je moj treći član vjere. Iz ta tri prva člana lako ćeš moći izvesti sve ostale, a da ih ne moram dalje nabrajati.

Ako je čovjek aktivan i slobodan, on radi iz vlastite pobude; sve su njegove slobodne radnje nezavisne od sistema što ga je providenje uredilo, te mu ne mogu biti pripisane. \_\_\_\_\_. Ali ga **ono** ne sprečava u činjenju zla, bilo što je zlo, koje čini jedno tako slabo biće, u njegovim očima sasvim beznačajno, bilo što ga ono ne može u tom spriječiti a da pritom ne skući njegovu slobodu i da ne prouzrokuje još veće zlo ponižavanjem njegove prirode. Ono ga je stvorilo slobodnim da se po slobodnom izboru odluči ne za zlo nego za dobro. Ono ga je također stavilo u mogućnost da vrši taj izbor uz pravilnu upotrebu sposobnosti kojima ga je obdarilo. Ali je ono tako ograničilo njegove sile da zloupotreba slobode, koju mu ono dopušta, ne može narušiti opšti red. Zlo što ga čovjek čini, pada na njega, a da usljed toga ne napusti ni najmanja promjena u poretku svijeta i da s tim ne spriječi da se ljudski rod i dalje održi, ako i ne bi htio. Gundati zbog toga što Bog ne sprečava činjenje zla, znači gundati zbog toga što je on ljudskom rodu dao tako visoke sposobnosti, što je u ljudske radnje unio moralnost koja ih oplemenjuje i što je ljudima dao pravo na vrlinu. \_\_\_\_\_. Upravo stoga da bismo zaslužili i postigli to zadovoljstvo, stavljeni smo na ovu Zemlju, obdareni smo slobodom, dovode nas u iskušenje naše strasti i obuzdava nas naša savjest. Šta je mogla i sama božanska svemoć da učini više u našu korist?

6. Pravilno poredajte rečenice koje nedostaju u odlomku.
- i. *Najveće je uživanje u zadovoljstvu samim sobom.*
  - ii. *Čovjek je, prema tome, slobodan u svojim radnjama i, kao takvo slobodno biće, oživotvoren nematerijalnom supstancijom.*
  - iii. *Ono ne traži zlo što ga čovjek čini zloupotrebljavajući slobodu koju mu ono daje.*
  - iv. *Izvor svake radnje je u volji slobodnoga bića; ne možemo dokazati dublji uzrok.*
- A. iv, ii, iii, i  
B. ii, i, iv, ii  
C. iii, i, ii, iv  
D. i, iv, ii, iii  
E. iv, i, ii, iii
7. U prvom paragrafu odlomka u prethodnom pitanju, fraza „*circulus vitiosus*“ znači:
- A. naivna zavrzlama
  - B. nepotpuno zaključivanje
  - C. konstantano odlučivanje
  - D. proizvoljno zaključivanje
  - E. kružno dokazivanje

8. Riječ **ono** u drugom paragrafu odlomka odnosi se na
- A. činjenje zla.
  - B. providenje.
  - C. zlo.
  - D. ponižavanje čovjekove prirode.
  - E. slobodno odlučivanje.

## TEKST 2

### Odlomak (Vegara, 2018).

*Biti žena u 21. stoljeću znači konstantnu borbu za izlaz iz nametnutog podređenog položaja u apsolutno "muškom svijetu", a biti žena u poslijeratnoj bh. kinematografiji, gledajući s jedne strane likove i karaktere koje portretiraju u filmovima, i s one druge, iza kamere, označava ženske društvene borbe koji, osim tradicionalnih, kulturoloških i historijskih ožiljaka, i dalje odišu neprevaziđenom ljepotom.*

*"Lik žene u postratnom bh. filmu doživljava potpuni preobražaj. Tek se u ovom periodu počinju snimati filmovi sa jakim i slojevitim glavnim ženskim likovima koji prevazilaze uobičajne obrasce žene kao majke ili žene kao seksualnog objekta. U savremenom bh. filmu ženski likovi su mnogo raznovrsniji te ih možemo vidjeti kao žene žrtve, žene buntovnice, žene autsajderke, uglavnom jake žene koje su trodimenzionalne", govori scenaristica Elma Tataragić, dodajući da je zanimljiv odnos scenarista i scenaristica, te režisera i režiserki prema ženskim likovima, ali i prema muškima. "Mislim da se savremeni bh. film ozbiljnije i temeljitije bavi pozicijom žene u našem društvu, te je samim tim i odnos prema ženskim likovima dublji."*

9. U kontekstu ovog odlomka, koji je od navedenih zaključaka tačan?
- A. Tataragić misli da savremena bh. kinematografija projektira stereotipne ženske likove.
  - B. Tataragić misli da savremena bh. kinematografija projektira provokativne ženske likove.
  - C. Tataragić misli da savremena bh. kinematografija viktimizira ženske likove.
  - D. Tataragić misli da savremena bh. kinematografija problematizira ženske likove.
  - E. Tataragić misli da savremena bh. kinematografija projektira kompleksnije ženske likove.
10. Odlomak iz prethodnog pitanja je pretežno fokusiran na temu:
- A. kinematografija danas
  - B. kinematografija i društvo
  - C. žena u 21. stoljeću
  - D. žene kao inspiracija i izvor filmskih priča
  - E. stanje kinematografije

#### **SAVING PLANET EARTH**

***Is it too late to save the planet? Fiona Gibbons thinks we can do it – if we stop to think about it.***

Most people recognise that the Earth is facing some major problems. But whether or not the damage is caused by us, it is up to us to find solutions because those of us who live in industrial societies are certainly not *helping* the situation.

Many scientists agree that global warming is caused by us releasing carbon emissions into the atmosphere. We need to look at where this carbon comes from, and the answer is fossil fuels. We have been taking oil, coal and gas out of the earth for many years now, and it's time to ask a simple question: How long can we keep taking it before it runs out? Even if there are enough fossil fuels for the next hundred years, we will have to find new sources of energy after that. We can't ignore the problem and leave it for the next generation to solve instead of developing the alternatives.

We have the technology to use energy from the sun to heat our houses. If we all put solar panels on the roofs of our houses, we will not need to use heating oil. We will need much less electricity too. We have to remember that electricity, as clean and convenient as it is, is mostly produced by burning fossil fuels. So, although we might not see the pollution this causes, it is still harming the atmosphere in a major way. Solar panels make use of energy which costs nothing – energy which is given off by the sun every day. And the latest technology captures *daylight*, not sunlight, so that even on a cloudy day, or in countries with very little sunshine, we still get free energy.

Wind energy too can be harnessed to make electricity. In many countries, there are already companies selling wind turbines to householders. They're expensive, but they also generate a lot of electricity without causing smog. In an average case, a wind turbine on your roof will save enough money on your electricity bill to pay for itself in ten years. If you live in a windy spot, or if you buy one of the bigger turbines, you will generate more electricity than you need. You can then sell this energy back to the electricity company – you will not only save money on your bills and help protect the environment, but you will make a profit too!

What if you can't afford a solar panel? What if you don't own your own house? Individual efforts are great, but governments need to react to the situation as well. The wind turbines that have been mentioned above can be gathered together in one place. This is called a wind farm. Together, all these turbines can produce enough electricity for a small town. The energy produced by waves can also be used to make electricity in a similar way. But these 'green' power stations can only be built if governments decide to spend money on them.

Unfortunately, one of the main reasons they don't is that members of the public complain that they are ugly. So this brings the problem back to the individual. What would you rather see out of your window: a

wind farm generating free electricity under a clear blue sky, or a typical power station with thick, black smoke pouring into the atmosphere?

The majority of us take electricity for granted. Most of our homes are powered by it and we rarely give a thought to where it comes from. It's difficult to see that, every time we leave a light on, a power station somewhere is burning fossil fuels and polluting the air that we breathe. We all need to think seriously about this. And if enough people get together, governments will be forced to change their policies. The future of the planet depends on it.

6. The writer says that the energy we get from fossil fuels
  - A. is better than the alternatives.
  - B. is a new source of energy.
  - C. will need to be replaced.
  - D. helps solve a problem.
  - E. is going to remain equally important as it is now.
  
7. What does the writer say about modern solar panels?
  - A. They work even at night.
  - B. They work when the sun is not shining.
  - C. They are less harmful than older panels.
  - D. They still cause some pollution.
  - E. They can't produce enough energy to meet our needs.
  
8. What does the writer say about putting a wind turbine on your roof?
  - A. You can sell it when you have finished with it.
  - B. It won't work if it's very windy where you live.
  - C. A small one won't save you any money.
  - D. It's economical in the long term.
  - E. They can still cause smog.
  
9. Wind farms are unpopular because:
  - A. people don't like to look at them.
  - B. they only supply urban areas.
  - C. they still pollute the atmosphere.
  - D. governments spend too much money on them.
  - E. people can't see a clear blue sky because wind turbines are too big.
  
10. The writer thinks that electricity is something that:
  - A. we should learn to live without.
  - B. governments will never decide to support financially.
  - C. most people think about a lot.
  - D. will not exist in the future.
  - E. we should produce in a cleaner way.

### MODERN COMMUNICATIONS – ONE BOY'S STORY

Philip is just like any other 16-year-old boy – except you won't find him playing computer games, or even watching television, in the near future. He tells us why ...

Two or three years ago, I was a normal kid – I was getting good marks at school, I did sport and I was healthy. All that seemed to change very quickly, though. I started having problems at home, at school, and with my friends. It took a while to realise what was causing all these problems.

I noticed that I was watching a lot of television. It started normally, and I used to watch a film in the evenings, or a comedy programme, or music videos. But then it became a habit – a bad habit! I would get home from school and immediately turn on the TV. **6**\_\_\_ Even that wasn't so bad – I still didn't think there was a problem. I started getting some low marks at school, but I didn't believe they were anything to worry about.

It started to get serious when the school called my parents in. **7**\_\_\_ My teachers asked my mum if there was anything wrong at home, but Mum couldn't think of anything. What Mum didn't know was that by then I was watching television in my room for half the night, and then struggling to get up for school in the morning, spending most of the day half asleep.

What I used to do was start watching a film at about ten, intending to go to sleep afterwards. But when the film finished, I just switched channels. If there was another film starting, I'd watch that. **8**\_\_\_ Sometimes, I'd wake up and the TV would still be on – I'd fallen asleep watching it. Eventually, I had to do something drastic, so I gave it to my cousin! There was still one in the living room, but I just never turned it on.

Life without television was hard for about the first week, but then I started to feel better. **9**\_\_\_ Within a month or two, I noticed that I had the same problem with the computer! It used to be the first thing I did when I came home – turn on the computer and check my emails. Then surf the internet or play games. For hours and hours! One day I realised I had been sitting at the computer for six hours. In that time, I had read and written emails, played several games and surfed aimlessly for ages, but I still hadn't even started to do the homework I had sat down to research!

I didn't sell my computer, though. I could never do that – besides, I need it for my school work. What I did do was uninstall all the games and programs that I didn't really need – things that were distracting me. Now, I only surf the Net when I need to, and the only programs I have installed on my computer are to do with music because I keep all my MP3s there. **10**\_\_\_ And if you want to communicate with me, you'll have to phone me because I don't have email any more!

But I've just got my exam results, and they're excellent. My parents are very pleased. I have some great friends (I didn't have time for friends before – only the electronic kind!) I've also just joined a football team and I'm getting in training for the start of the season. If you ask me, there's nothing wrong with television, and there's nothing wrong with computers either. But there are other things that are more important. I think computers and televisions should come with a health warning!

**S1 - No more games and no more useless surfing!**

**S2 - They said that there was a big drop in my marks and that they were worried about me.**

**S3 - I would eat in front of it and do my homework in front of it.**

**S4 - That feeling didn't last long, though.**

**S5 - And maybe even watch a third, or turn over and watch music videos until three or four in the morning.**
